Accuride

PRECISION BALL BEARING SLIDE PRODUCTS

For Wood Furniture & Wood Cabinetry

Spring 2011

Accuride

Accuride International Inc. started as a small tool and die shop in 1962 in South Gate, California, producing top-quality slides for tape drives and copy machines.

In the late 1960s, Accuride developed ball bearing slides for metal office furniture. The company's design engineers then took on the wood furniture market, developing features such as breathing tabs to absorb tolerances in wood products.

Today, still privately held, Accuride has nearly one million square feet of manufacturing space around the world and is the largest company in the world dedicated to the innovative design and manufacturing of ball bearing slides. Accuride slides are designed into a wide range of applications from fine furniture and appliances, to electronic enclosures, and automotive and industrial equipment.

Accuride built its reputation on quality and ensures strict standards are met by maintaining control over many manufacturing processes others routinely job-out. Progressive dies, roll forms, and plating lines are designed, built, and maintained in house, as are other key tools and machinery.

The North American facilities feature the largest tooling operation in the industry. Globally, Accuride employs more than 100 tool and die makers, has 77 roll form machines and two in-house steel mills.

Accuride plates over 75,000,000 square feet of material per year and is the largest zinc plater in the world. Accuride was the first slide manufacturer to use the electrocoating process on ball bearing slides and has developed finishes that vigorously resist corrosion.

Accuride's test laboratory is among the largest in the industry. Products are tested to meet or exceed standards established by ANSI and other testing agencies.

Accuride was the first U.S. based slide manufacturer awarded ISO 9000 certification. Today, all our production facilities have quality management systems registered to ISO 9001:2008.

As a part of Accuride's global commitment to adhering to local

environmental laws (even exceeding the standards, whenever practical), using raw materials efficiently, and reducing waste, all slide finishes and components comply with the Restriction of Hazardous Substances (RoHS) Directive.

To the reader:

This catalog is designed to assist you in making the proper slide selection for your application. The information listed on the next two pages explains the pertinent factors to consider when selecting a slide. The products in this catalog are divided into six sections:

- Light-Duty Slides Load ratings up to 75 pounds. These slides are suitable for small box drawers in residential and commercial cabinetry.
- Medium-Duty Slides Load ratings range from 90-100 pounds. This group is appropriate for residential cabinetry, casework, and commercial desk and credenza drawers.
- ✦ Heavy-Duty Slides Load ratings from 100–966 pounds. Suitable for a wide range of applications such as wide lateral files, large storage drawers, file cabinets, and pantry pull-outs.
- Media Hardware Collection Load ratings from 14.5-300 pounds. These products offer solutions for residential and commercial applications requiring access to media and other electronic components.
- ✦ Flipper Door Slides[®] Load ratings from 25–75 pounds. These slides carry doors for entertainment centers, overhead storage units, and armoires.
- Specialty Slides Load ratings from 45–350 pounds. + This group includes stainless steel products, slides for kitchen cutting boards, pencil drawers, pull-out and pass-through shelves, and keyboard trays.

Each section has a convenient selection guide, along with detailed descriptions for each product. For additional information, technical sheets, and specific design information, visit our web site at www.accuride.com.

DESIGN FACTORS

As with the selection of any system component, when choosing a slide for a specific application, you should consider the full range of features by comparing the project requirements to the key performance elements of the slide.

Length—Slide length is measured as the longest dimension of a fully closed slide. As a rule, always use the maximum length allowable in the application.

Extension—Or "travel", refers to how far the drawer extends from the cabinet.

- 3/4 extension Drawer opens partially, about 3/4 of the total slide length.
- Full extension Drawer opens the same amount as the slide length.
- **Over travel** Drawer opens more than the length of the slide.

Drawer Width—In general, wider drawers require a slide with a higher load rating and a cross section designed to withstand lateral stress. Consult product technical sheet for slide recommendations based on drawer widths.

Types of Movement—There are generally two types of slide movement:

Telescoping	Slide movement occurs in stages. The
	drawer member extends fully and then
	picks up the intermediate member,
	pulling it to the end of the travel.
Progressive	Movement is a result of all slide

Progressive Movement is a result of all slide members moving simultaneously. This type of movement provides extremely smooth, quiet movement.

Disconnects—The disconnect feature enables you to remove a drawer or drawer member for mounting or general purposes. Four types of disconnects are commonly found in slides for commercial and residential applications:

- Lever Disconnect is achieved by releasing an internal lever and pulling the drawer straight outward, away from the cabinet.
- **Rail** A rail latch allows you to raise the drawer off the slide and away from the cabinet. This type of disconnect facilitates smooth movement and easy drawer removal.
- No levers or latches are required to Friction remove the drawer. Disconnect is achieved by pulling the drawer firmly through the resistance of the ball retainer.
- A latch is pressed to release the drawer. Push Latch Disconnect is achieved by pulling the drawer firmly through the resistance of the ball retainer.
 - Note: Disconnect instructions are available online at www.accuride.com/woodworking *lresources/disconnect*

Slide Profiles—More than one slide profile (or height) may be appropriate for a given application. Accuride provides several low-profile design options for applications in which a smaller profile would enhance the appearance of the completed unit.

LOAD FACTORS

Load Rating—Most Accuride slides are tested a minimum of 50,000 cycles in accordance with the guidelines of all applicable ANSI/BIFMA specifications, or as appropriate for some moderate use applications. See the product technical sheet for specific information regarding test criteria. Thorough testing means that you can count on Accuride slides to meet industry-accepted criteria.

Our slides are rated for the dynamic load that an 18" pair will carry without failure (load rating decreases proportionally beyond the 18" length). In all cases, the static (resting) load capacity of each model is at least twice the load rating, providing at minimum a 100% static safety factor, even when the slide is loaded to its maximum rating. Because slide performance may be affected by factors unique to a specific application, always test slides in the intended application.

Flat Mounting—For optimal slide performance, mount slides only as indicated in the catalog or on the technical sheet. Certain slides may be mounted flat under a drawer, but the resulting load rating will be at least 50% less than the load rating applicable to the same pair of slides mounted vertically on the side of the drawer. Please consult the product technical sheet for specific flat-mount load rating information.

Shock/Vibration—Subjecting slides to shock and vibration may adversely affect the performance. Applications that are subject to these conditions should be tested to evaluate the affect on slide performance. If conditions are severe, select a heavier-duty slide.

APPLICATION FACTORS

Unit Construction—When installed in a drawer or cabinet that is lightweight and flexible, drawer slides can contribute to the structural rigidity of the unit. To ensure that the slide is able to provide this support, select a model with a slightly higher load rating and larger cross section than you would ordinarily need for the application.

Installation—Most slides are designed to be mounted in pairs on the sides of drawers or moving unit. When installing slides, exercise care to ensure that they are mounted parallel to each other, in vertical and horizontal axes.

Before mounting slides other than as designed, carefully consider any potential adverse effects on the slide and, if necessary, consult the factory. For example, mounting slides flat under the drawer, rather than on the side, will lower the load rating by at least 50%, but mounting a slide high on one side and low on the other side will have little adverse effect on load rating. Be sure to evaluate the mounting scheme thoroughly and test as needed. Not all slide models can be used in flat-mount applications.

ENVIRONMENTAL FACTORS

Unless otherwise stated, Accuride slides are designed for indoor use and should be protected from excessive moisture, chemical fumes, dirt, and corrosion. The Accuride self-cleaning ball retainer protects slide raceways by removing foreign particles between ball bearings, and the lubricant provided is sufficient for normal slide life. Use care when applying finishing agents because the overspray may affect slide movement. Should you need to clean the slides, you can re-lubricate them with a quality grease rated "EP" for extreme pressure.

Extreme temperatures can also affect the lubricant and plastic or rubber components. Commercial drawer slides are designed to be used for extended periods in temperatures between 0 and 180 degrees Fahrenheit. For service outside normal temperature and humidity ranges, consult the factory.

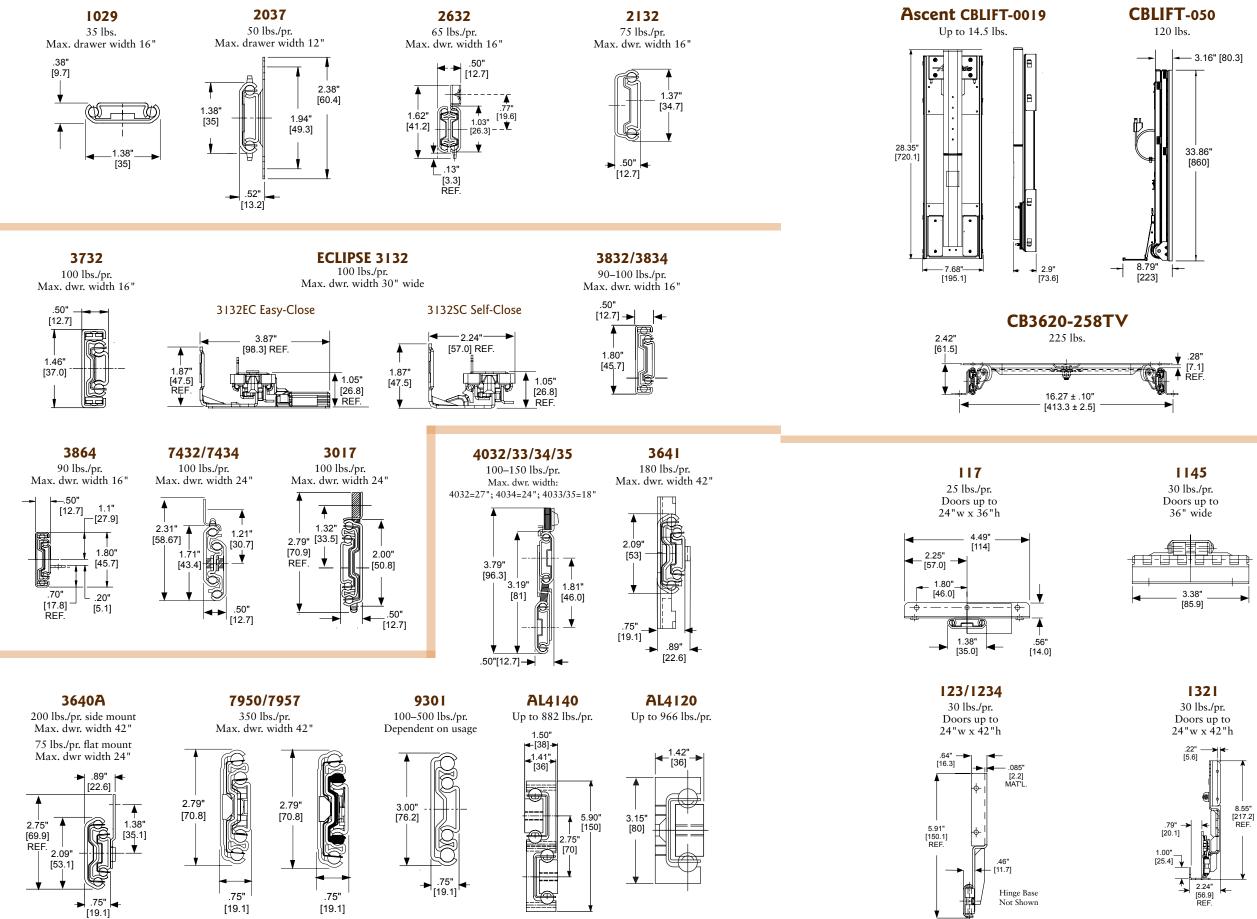

TECHNICAL SUPPORT

Please visit the Technical Resources section on our web site at www.accuride.com for the most current technical information.

35-lb. [16 kg] load rating

1029

A concealed undermount slide for small shallow drawers in light-duty applications

[9.7]

1.38"

[35]

SPECIFICATIONS

- 3/4 extension •
- Drawers up to 16" [406 mm] wide •
- Friction disconnect
- Steel ball bearings ٠
- Lengths 13"-27" [330-685 mm] •
- Clear zinc or black finish •

SPECIAL FEATURES

- Single slide concealed under drawer
- Eliminates side space requirements ٠

Adjustable rear mounting bracket: P/N 4010-0157-CE

Reversed rear mounting bracket: P/N 4010-0353-CE

2037 50-lb. [23 kg] load rating

Light-duty kitchen, bath, desk, or box drawers where premium movement is required in 3/4 extension.

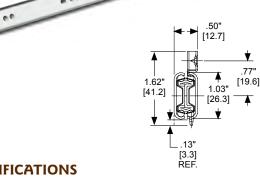

SPECIFICATIONS

- 3/4 extension
- .52" [13.2 mm] side space •
- Drawers up to 12" [305 mm] wide
- Cam Drawer Adjust
- Rail mount/disconnect
- Polymer ball bearings
- Even lengths 12"–28" [302–705 mm]
- Clear zinc or black finish

2632 65-lb. [30 kg] load rating

Suitable for light-duty commercial or residential use; from store fixtures to lab furniture to kitchen box drawers.

SPECIFICATIONS

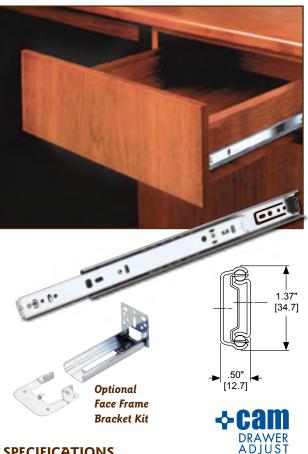

- Full extension
- .50" [12.7 mm] side space
- Drawers up to 16" [406 mm] wide
- Rail mount/disconnect
- Steel ball bearings •
- Even lengths 8"–22" [203–559 mm]
- Clear zinc or black finish

SPECIAL FEATURES

- Lowest profile rail mount
- Hold-in detent to prevent drawer roll-out and bounce-back
- Silenced in and out
- 32 mm and traditional hole pattern

2132 75-lb. [34 kg] load rating

Use in small shallow drawers intended for office supplies or kitchen utensils in commercial or residential applications.

SPECIFICATIONS

- 3/4 extension
- .50" [12.7 mm] side space
- Drawers up to 16" [406 mm] wide
- Lever disconnect
- Steel ball bearings
- Lengths 10"–28" [250–700 mm]
- Clear zinc or black finish

SPECIAL FEATURES

- Low profile
- Hold-in detent
- Cam Drawer Adjust
- 32 mm and traditional hole pattern

Optional face frame bracket kit: P/N 4180-0321-XE

Pilaster mounting kit: P/N 4180-0266-XE

3732 100-lb. [45 kg] load rating

This low profile slide has a convenient face frame mounting hole at the front of the slide. Ideal for kitchen, bathroom, or institutional box drawers.

SPECIFICATIONS

- Full extension
- .50" [12.7 mm] side space
- Drawers up to 16" [406 mm] wide
- Unhanded push latch disconnect
- Ball bearings:
 Zinc and black finish-steel
 White finish-steel and polymer
- Even lengths 12"–28" [305–711 mm]
- Clear zinc, white, or black finish
- Available in Production Packaging (FP)

Optional rear face frame bracket mounting kit: P/N 4180-0431-XE

SPECIAL FEATURES

- Lowest profile side mount slide
- Hold-in detent to prevent drawer roll-out and bounce-back
- Enhanced silencing in and out
- 32 mm and traditional hole pattern
- Front face frame mounting hole

SAVE TIME! PRODUCTION PACKAGING (FP) AVAILABLE FOR ALL LENGTHS

Slides are shipped with the drawer members disconnected from the cabinet members. The two types of members are packaged separately within the same box, allowing the drawer members to be distributed to a different area of the shop for installation.

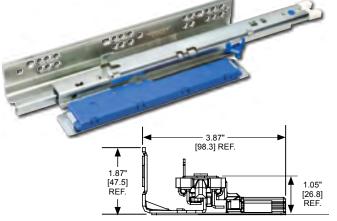

3132 Eclipse 100-lb. [45 kg] load rating

Available with Easy-Close or Self-Closing options, the *Eclipse undermount products offer concealed slide* solutions for both commercial and residential installations.

3132EC - EASY-CLOSE

Brings drawers to a gentle close

SPECIFICATIONS

• Full extension

MEDIUM-DUTY SLIDES

- ٠ Accommodates drawers up to 30" [762 mm] wide
- Front lever disconnect
- Steel and polymer ball bearings
- Even lengths 12"–28" [305–711 mm], plus 15" [381 mm] and 21" [533 mm]; 10" [254 mm] available for 3132 EC only
- Clear zinc finish

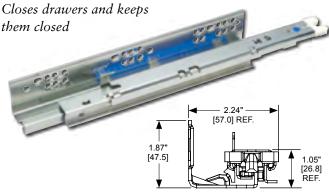

SPECIAL FEATURES

- Face frame and frameless compatible
- 1/4-turn cam lock to secure drawer front position ٠
- Vertical and horizontal cam adjustment up to 1/8" ٠
- Slotted holes for front-to-back adjustment •
- Self-adjusting drawer depth •
- Optional rear face frame brackets provide 2" of depth adjustment.
- 32 mm and traditional hole pattern

3132SC - SELF-CLOSING

- Silenced in and out
- 32 mm and traditional hole pattern ٠

Optional gang locking system: P/N 4180-0345-XE

3640A 200-lb. [91 kg] load rating

Can be side or flat mounted. Recommended for wider lateral file drawers.

SPECIFICATIONS

- 1" [25.4 mm] over travel
- .89" [22.6 mm] side space
- Adapter rail mount/disconnect
- Steel ball bearings
- Even lengths 12"-28" [305-711 mm] •
- Clear zinc or black finish

SPECIAL FEATURES

- Dual mounting options: - 200 lb. [91 kg] side mount
 - drawer width 42"[1067 mm]
 - 75 lb. [34 kg] under/flat mount - drawer width 24"[610 mm]
- Hold-in detent to prevent drawer roll-out and bounce-back
- 32 mm hole pattern

7950/7957

350-lb. [159 kg] load rating

An intermediate load-rating choice for wide drawers in kitchens, store fixtures, or institutional storage applications.

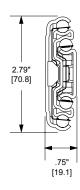

SPECIFICATIONS

- Full extension
- .75" [19.1 mm] side space
- 7950: non-disconnect 7957: handed lever disconnect
- Accommodates drawers up to 42" [1067 mm] wide
- Steel ball bearings •
- Even lengths 12"-36" [305-914 mm]
- Clear zinc finish

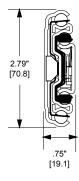

SPECIAL FEATURES

- May be side or flat mounted:
 - Side mount load capacity up to 350 lbs. [159 kg]. - Flat mount load capacity up to 150 lbs. [68 kg].
- Bridged ball retainer design prevents retainer migration.

7950 Non-Disconnect Heavy-Duty Slides

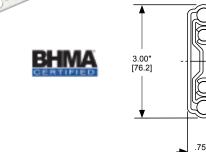

7957 Handed Lever Disconnect

9301 150–500-lb. [68–227 kg] load rating

Well suited for large pantry pull-outs, vehicular storage, or other drawers with a heavier load.

SPECIFICATIONS

- Full extension
- .75" [19.1 mm] side space
- Non-disconnect
- Silenced in and out
- Steel ball bearings
- Even lengths 10"-36", 40", 42", 44", 48", and 60" [254–914, 1016, 1067, 1118, 1219, and 1524 mm]
- Clear zinc finish

LOAD RATINGS

Flat mount: 150 lb. [68 kg]* Drawer widths up to 32" [813 mm]

Mobile applications: 300 lb. [136 kg]* Drawer widths up to 32" [813 mm]

Frequent usage: 400 lb. [181 kg] Drawer widths up to 42" [1067 mm]

Moderate usage: 500 lb. [227 kg]* Drawer widths up to 18" [457 mm]

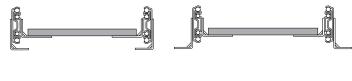

Bracket-mounted: 350 lb. [159 kg] Drawer widths up to 42" [1067 mm]

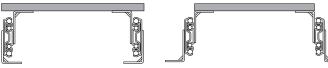

Bracket-mounted: 500 lb. [227 kg] Drawer widths up to 18" [457 mm]

ACCESSORY PLATFORM BRACKET KITS

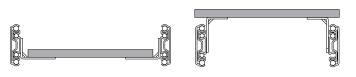

- Provides six additional mounting configurations
- Available in lengths of 12", 16", 22", and 28" [305, 406, 559, and 711 mm]
- Four bracket lengths have been designed to be used individually or in combination to accommodate all slide lengths
- See technical sheet or www.accuride.com for bracket kit ordering information
- Clear zinc finish

Two Side-Mount Options

* Load ratings based on 10,000 cycle test

Caution: This slide must never be used as a pull-out step, platform or any other application supporting human weight, as injury may result.

Super Heavy-Duty Aluminum Slides

1.50'

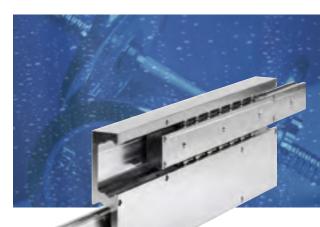

←[38]+

5.90" [150]

AL4140

882-lb. [400 kg] load rating

Super heavy duty, with full extension in lightweight aluminum that offers corrosion resistance.

SPECIFICATIONS

- Full extension
- 1.5" [38 mm] side space
- Load rating based on a pair of slides spaced 24" [610 mm] apart and tested to 10,000 cycles.
- Non-disconnect
- Stainless steel ball bearings
- Lengths: 16", 20", 24", 28", 32", 36", 40", 44", and 48" [400, 500, 600, 700, 800, 900, 1000, 1100, and 1200 mm]*

SPECIAL FEATURES

- Manufactured with lightweight aluminum, combined with stainless steel ball bearings and ball retainers to provide corrosion resistance and strength without the additional weight of steel slides.
- * The lengths indicated in inches are approximate conversions from the metric measurements. Please see technical sheet for exact dimensions.

AL4120 966-lb. [438 kg] load rating

Super heavy duty, ³/₄ extension slide in lightweight aluminum that offers corrosion resistance.

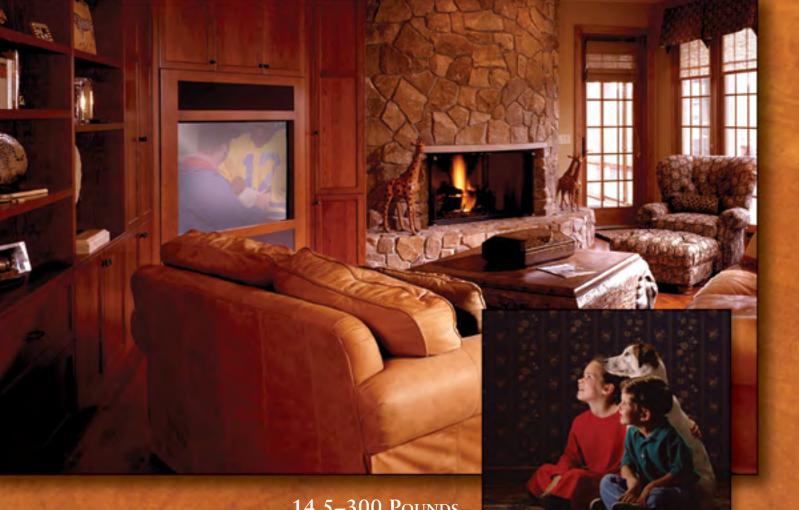

SPECIFICATIONS

- 3/4 extension
- 1.42" [36 mm] side space
- Load rating based on a pair of slides spaced 24" [610 mm] apart and tested to 10,000 cycles.
- Non-disconnect
- Stainless steel ball bearings
- Lengths: 16", 20", 24", 28", 32", 36", 40", 44", and 48" [400, 500, 600, 700, 800, 900, 1000, 1100, and 1200 mm]*

SPECIAL FEATURES

- Manufactured with lightweight aluminum, combined with stainless steel ball bearings and ball retainers to provide corrosion resistance and strength without the additional weight of steel slides.
- * The lengths indicated in inches are approximate conversions from the metric measurements. Please see technical sheet for exact dimensions.

CBLift-0019 Ascent

14.5-lb. [6.6 kg] load rating

The Ascent is a push-to-operate mechanical lift that provides access and conceals screens in desks and other cabinetry.

SPECIFICATIONS

- Accommodates screens from 5.5–14.5 pounds [2.5–6.6 kg], up to 17.5" tall, and 22" diagonally
- No power required; movement is controlled by counterbalancing weights
- Swivels ± 112.5° for expanded viewing access
- Black electroplate finish

SPECIAL FEATURES

- Easy to install
- Unit raises 21 inches in less than 2 seconds.

OPTIONAL KITS

Additional Weight Pack P/N 2990-9774-BE

VESA 18° Tilt Bracket P/N 2990-9776-BE

7.68"

2.9*

Weight Extension Plate Kit P/N 2990-9775-BE

VESA Fixed Bracket P/N 2990-9777-BE

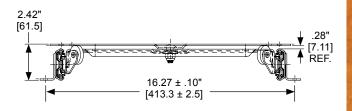

Note: Packaging includes wire management, cable control kit, and one weight pack.

CB3620-258TV

225-lb. [102 kg] load rating*

A smooth pull-out swivel that holds televisions up to 36" diagonal.

SPECIFICATIONS

- 14" [356 mm] extension
- Holds televisions up to 36" [914 mm] diagonal ٠
- Steel ball bearings
- Black zinc plating

SPECIAL FEATURES

- Hold-in detent to prevent roll-out and bounce-back
- Smooth, stable movement
- 360° swivel
- Silenced in and out

* Load rating based on 10,000 cycle test.

CBLift-050 Quick Lift

120-lb. [54 kg] load rating

A remote-controlled mechanism that carries flat-panel televisions in audio/visual, home theater, or entertainment center cabinetry.

OPTIONAL KITS

Replacement Remote Controls: P/N 4180-0654-XE

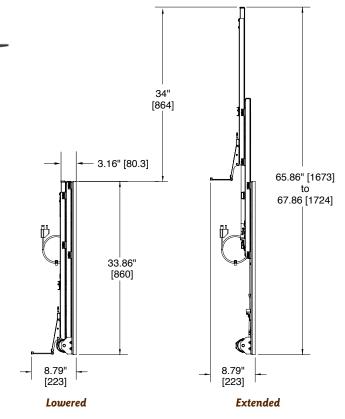

Fixed Lid Bracket Kit: P/N 4180-0650-XE

SPECIFICATIONS

- Carries flat-panel television screens up to 50" diagonal and 33.5" tall
- Fits standard cabinets 34" tall
- Minimum cabinet opening 30"w x 10"d
- Supplied pre-mounted to a ³/₄" thick plywood backing board
- Black finish

SPECIAL FEATURES

- Reinforced steel rails for strength and stability
- Auto-reverse mechanism reverses lift movement when an obstruction is encountered
- Standard- and key fob-sized remote controls
- Control box mounted on the assembly for manual operation
- Cable management
- UL/CE approved components
- Designed for turn-key installation; no adjustments, modifications, or alterations necessary.

M.A.C.s

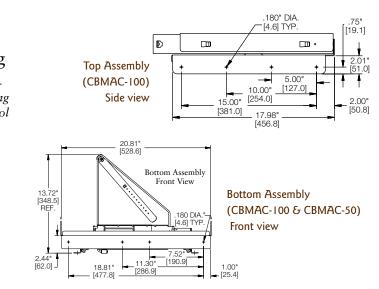

150-300-lb. [68-136 kg] load rating

The M.A.C. gives end-users full access to media components and provides aesthetic integration into surrounding cabinetry. It is suitable for security and electronic control centers, sound system components, lecterns, and other electronic set ups.

SPECIFICATIONS

- Accommodates shelving units 20-3/4"
 [527 mm] wide by 18" [457 mm] deep
- Full 20" [559 mm] extension
- Slides black electroplate; swivel plate black powdercoat
- Compatible with EIA mounting standards
- Steel ball bearings

SPECIAL FEATURES

- 90° rotation in both directions provides full access to the back of shelving units
- Rotation function actuates only when slides are fully extended preventing damage to the inside of the cabinet
- Detent-in and detent-out holds shelving units securely in place
- Cable management helps keep wires clear of the slides
- Cable clips attach to shelves to keep wires neatly bundled at the back of components
- Power strip and cable ties also included

CBMAC-100

- 300-lb. [136 kg] load rating*
- Includes top and bottom swivel assemblies
- Accommodates shelving units up to 55" [1397 mm] tall

CBMAC-50

- 150-lb. [68 kg] load rating*
- Includes one swivel assembly
- Accommodates shelving units up to 36" [914 mm] tall

Additional cable clips (2): P/N 4180-0566-XE

* Load ratings based on 10,000 cycle test

SLIDES

SPECIALTY

Known as the pencil drawer slide, this product is designed for suspended drawers beneath desks or tabletops.

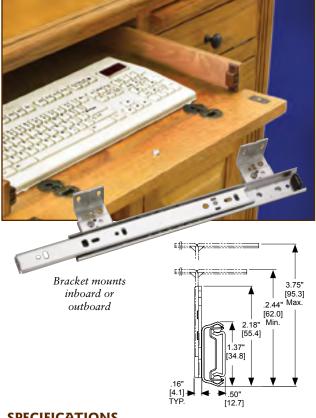

SPECIFICATIONS

- 3/4 extension
- .44" [11.2 mm] side space
- Drawer widths up to 16" [406 mm]
- Friction disconnect
- Steel ball bearings
- Simple, fixed height bracket installation
- Lengths 12"–28" [305–711 mm]
- Clear zinc or black finish

2109 75-lb. [34 kg] load rating

Keyboard trays, pencil drawers, and suspended drawers requiring a detent in and out.

SPECIFICATIONS

- 3/4 extension
- .50" [12.7 mm] side space (.66" [16.8 mm] with bracket)
- Drawer widths up to 16" [406 mm]
- Lever disconnect
- Steel ball bearings
- Even lengths 12"–28" [300–700 mm]
- Clear zinc or black finish

SPECIAL FEATURES

- Hold-in and hold-out detent
- Variable height mounting brackets
- Flexibility of inboard or outboard bracket mounting

Mounting bracket kit (zinc): P/N 4180-0400-XE Mounting bracket kit (black): P/N 4180-0401-XE

Keyboard Systems

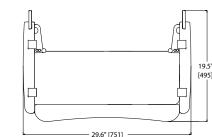

Ergonomically designed for home and business office workstations.

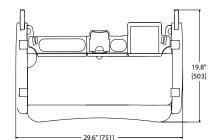

SPECIFICATIONS

- Fully concealed slides ensure no rough or exposed edges
- Removable palm rest allows unit to accommodate virtually any size keyboard
- Extra-wide tray provides ample mousing surface
- Built-in cable management
- Removable mouse pad for left or right-handed mousing
- Typing surface held in place when in use or stored
- Mounting brackets feature seven adjustment heights and can be mounted inboard or outboard depending upon installation requirements
- Steel ball bearings

Presenting four stainless steel products that provide corrosion-resistant solutions for installations where exposure to moisture or high humidity is a key environmental factor. These products are a great solution for drawers or pull-out shelves in outdoor kitchens, poolside structures, greenhouses, garages, sheds and barns, marine cabinetry, and more.

SS2028 100-lb. [45 kg] load rating

With the narrowest side space of the group, this model provides an advantage in installations where space must be maximized.

SPECIFICATIONS

- 3/4 extension •
- .38" [9.5 mm] side space ٠
- Drawer widths up to 18" [457 mm]*
- Non-disconnect
- Stainless steel ball bearings
- Lengths 12"-28" [300-700 mm]**
- Stainless steel

SPECIAL FEATURES

- Hold-in detent
- Corrosion resistant

SS0330 143-lb. [65 kg] load rating

Providing a load capacity on the lighter side of the heavyduty category, this slide is for heavier drawers or pull-out shelves in applications that require full extension.

SPECIFICATIONS

- Full extension
- .75" [19.1 mm] side space
- Drawer widths up to 18" [457 mm]*
- Non-disconnect
- Stainless steel ball bearings
- Lengths 12"-24" [300-600 mm], plus 28" [700 mm]**
- Stainless steel

SPECIAL FEATURES

- Hold-in detent
- Corrosion resistant
- Load rating based on 18" slides in 18" drawers cycled 80,000 times. ** The lengths indicated in inches are approximate conversions from the metric measurements. Please see technical sheet for exact dimensions.

SS5322 265-lb. [120 kg] load rating

The unique features on this model are over travel, for complete access to contents, and bracket mounting, which provides a disconnect method.

SPECIAL FEATURES

- Hold-in detent
- Corrosion resistant
- Easy-mount brackets with locator pins to simplify disconnect.

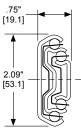

Specialty SLIDES

Stainless S

SS5321 350-lb. [159 kg] load rating

The most heavy-duty performer of the group, this slide offers a slightly narrower profile, over travel, and the greatest load rating of the collection.

75-lb. [34 kg] load rating

2019

Known as the quick-install shelf slide, this product has bent-down tabs to allow for platform-style shelf mounting.

SPECIFICATIONS

- 3/4 extension
- .38" [9.7 mm] side space
- Drawers up to 16" [406 mm] wide
- Lever disconnect
- Steel ball bearings •
- Even lengths 12"–28" [305–711 mm]
- Clear zinc or black finish ٠

SPECIAL FEATURES

- Hold-out detent
- Optional bracket kit mounts in-board or out and provides up to 1.31" [33.2 mm] of vertical adjustment.

Optional bracket kit, zinc: P/N 4180-0255-XE

Optional bracket kit, black: P/N 4180-0257-XE

2002 50-lb. [23 kg] load rating

This slide offers two-way travel, which works well on pass-through shelves, kitchen islands, and medical carts.

SPECIFICATIONS

- 3/4 extension
- .38" [9.7 mm] side space
- Drawers up to 12" [305 mm] wide
- Non-disconnect
- Steel ball bearings •
- Even lengths 12"–28" [305–711 mm]
- Clear zinc or black finish

SPECIAL FEATURES

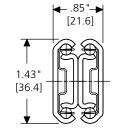

- Shelf/bottom mount tabs
- Internal detent secures in center position
- Provides access from both sides of installation

0363 100-lb. [45 kg] load rating

Offering full extension and two-way travel, this slide is for use in kitchen islands, dining or entertainment bars, or other cabinetry or carts that benefit from two-sided access.

SPECIFICATIONS

- Full extension from center point in both directions
- .85" [21.6 mm] side space
- Drawers up to 18" [457 mm] wide
- Non-disconnect
- Steel ball bearings
- Tested to 80,000 cycles •
- Available lengths: 16", 20", 24", and 28" [400, 500, 600, 700 mm]
- Clear zinc finish

SPECIAL FEATURES

- Two-way travel provides access from both sides of installation
- Hold-in detent at center keeps conveyances in position until use

322 100-lb. [45 kg] load rating

Limited Lifetime Warranty

Accuride International Inc. warrants its Accuride-branded drawer slides against defects in material and workmanship for so long as the original purchaser owns them.* This warranty does not cover drawer slides which have been damaged due to abuse, improper installation, excessive loads, or any use contrary to the instructions accompanying the product. Accuride will send the original purchaser a replacement of the same model or a comparable model at no cost. This warranty is for replacement only and does not cover the cost of removal, installation, or incidental charges.

To obtain a replacement slide under this warranty, contact Accuride Technical Support within 30 days of the discovery of the defect. Please let us know how the product was used and the type of defect or malfunction experienced. Contact us by e-mail or phone at:

Technical@accuride.com or 562-903-0200, ext. 1436

The foregoing express limited warranty is in lieu of all other express warranties and excludes incidental or consequential damages. This warranty does not apply to products sold and used outside of the United States and Canada. All warranties implied by state law, including implied warranties of merchantability and fitness for a particular purpose, are expressly limited. Some states do not allow limitations on how long an implied warranty lasts or exclusion of incidental or consequential damages, so the foregoing limitation or exclusion may not apply to you. This Limited Lifetime Warranty gives you specific legal rights, and you may have other rights which vary from state to state.

* This warranty does not apply to the cylinder for the Easy-Down® Flipper Door Slide®, CBERGO-TRAY Keyboard Systems, or any other Accuride product for which the expressed warranty differs from the Limited Lifetime Warranty offered above. Call Accuride Technical Support for further information.
